Flat Screen Printing

Machine

巨新企业介绍

公司拥有一流的设备、一流的厂房和优秀的管理团队及员工队伍。公司专业研发、制造和销售高品质的平网印花机整机设备及零配件，是目前国内领先，信誉优良的专业印花机制造商之一。本公司生产的KS9000新型平网印花机系列产品，性能可靠，印花精度及速度都处于国际先进水平。产品品质得到了国内外用户的一致信赖。公司奉行“诚信为人，用心做事，开拓创新，赶超一流”的企业理念，通过科学管理，专注科技和品牌服务，不断提升企业综合运营能力及市场竞争能力。热忱欢迎国内外客户前来洽谈与合作！

The company has first-class equipment, first-class factory and excellent management team and staff team. The company is specializing in the R&D, manufacture and sale of high quality flat screen printing machine equipment and spare parts, Juxin is currently one of the leading domestic and professional printing machine manufacturers.

This company products the KS9000 new type flat screen printing machine series products, reliable performance, the printing precision and speed are both at the international advanced level. The product quality is obtained the trust of customers at home and abroad.

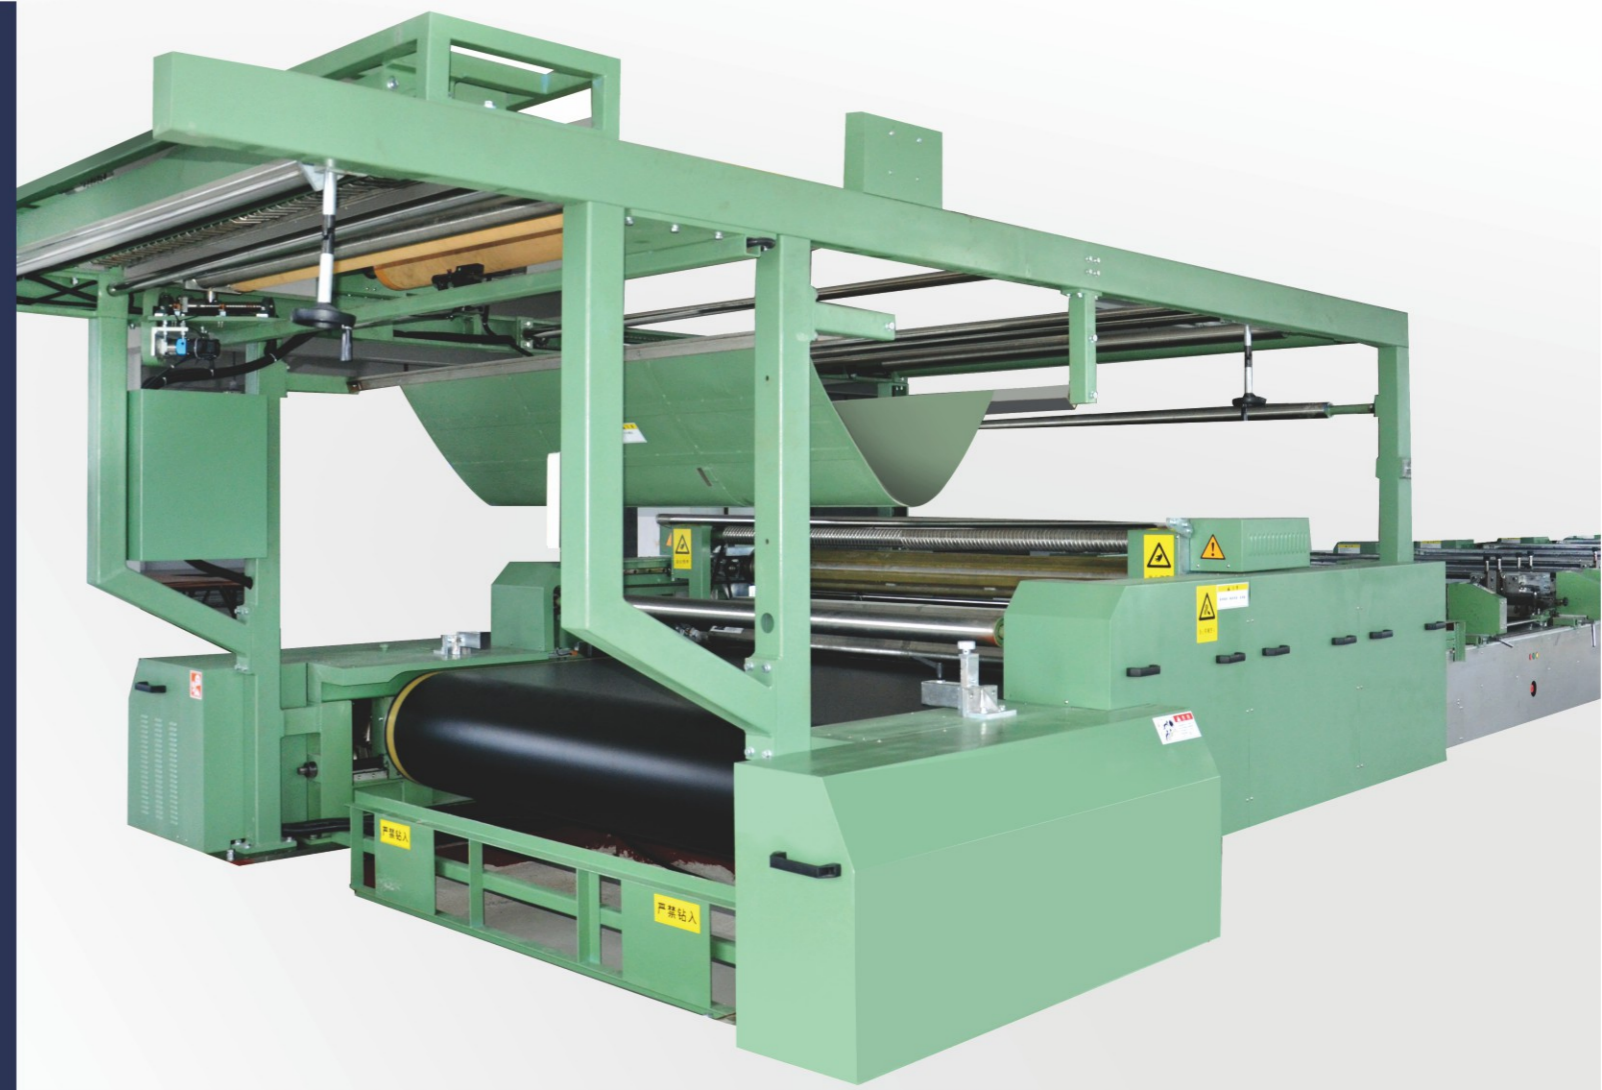

The company pursues the business philosophy of "human integrity, hard work, pioneering innovative, overtake first-class", through scientific management, technology and brand service, continuously to improve enterprise comprehensive operation ability and market competition ability.

Warmly welcome customers to negotiate and cooperate!

KS-9000 Scraper Flat Screen
Printing Machine
KS-9000 刮刀平网印花机

KINGstar 巨新

Flat Screen Printing Machine

KS-9000 刮刀平网印花机进布装置配备两次自动对边装置，可实现自动进布，无张力连续贴布，并配备贴布辊自动控温加热装置。特别适用于针织布、梭织布、弹力布、家纺布料、泳装布等纺织面料。

KS-9000 scraper flat screen printing machine cloth-into device is equipped with two automatic edge device, which can realize automatic into cloth, continuous paste cloth without tension, and equipped with paste cloth roller automatic temperature control heating device. Especially is suitable for knitted cloth, woven cloth, elastic cloth, home textile cloth, swimwear cloth and other textile cloth .

KS-9000刮刀平网印花机

印花导带驱动采用最新型双伺服电机驱动定位及电子同步控制技术配合高精度传动机构，对花精度可达 $\pm 0.1\text{MM}$ ，印花速度可达8-30M/MIN。

KS-9000 Scraper Flat Screen Printing Machine

Printing belt driver uses the newest double servo motor driver positioning and electronic synchronous control technique with high precision transmission mechanism, printing precision can be up to $\pm 0.1\text{ MM}$, printing speed can be up to 8-30 M/MIN.

印花网框升降采用最新型伺服电机升降，速度快，定位准。升降高度可任意调节，安静无噪音。
Printing screen frame uses the newest elevator servo motor to up and down, high speed and accurate position.
The height can be adjusted, quiet with no noise.

Kingstar

Flat Screen Printing Machine

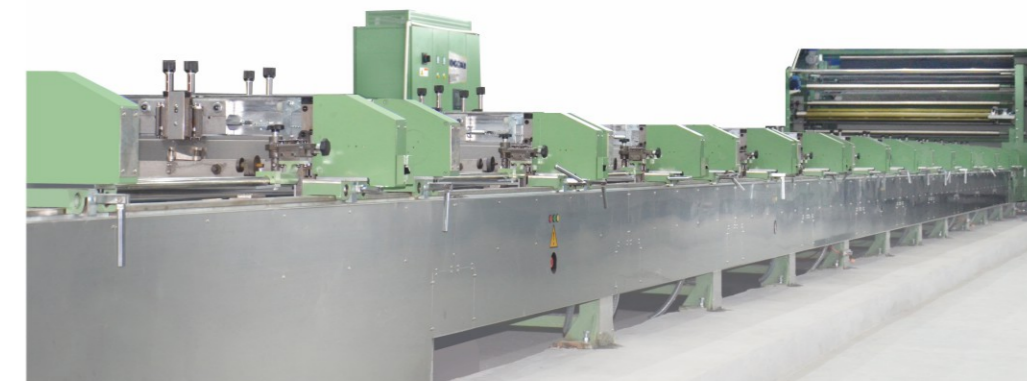

Flat Screen Printing KS-9000 刮刀平网印花机

KS-9000 刮刀平网印花机刮印机构更加可靠无故障，刮刀行程定位可实现一键操作。每套色更采用人机触摸屏操作，可实现工艺参数传输及记忆功能。
KS-9000 scraper flat screen printing machine scrape mechanism is more reliable and trouble-free printing mechanism, scraper routing positioning can realize one key operation. Each color uses man-machine touch-screen operation, can realize process parameters transmission and memory functions.

KINGstar 巨新

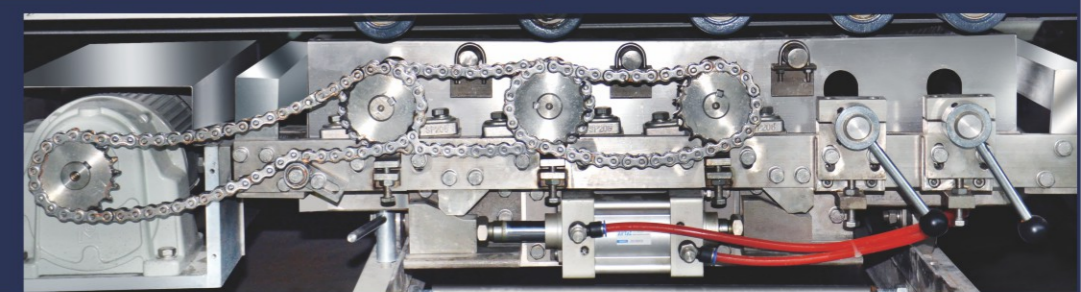

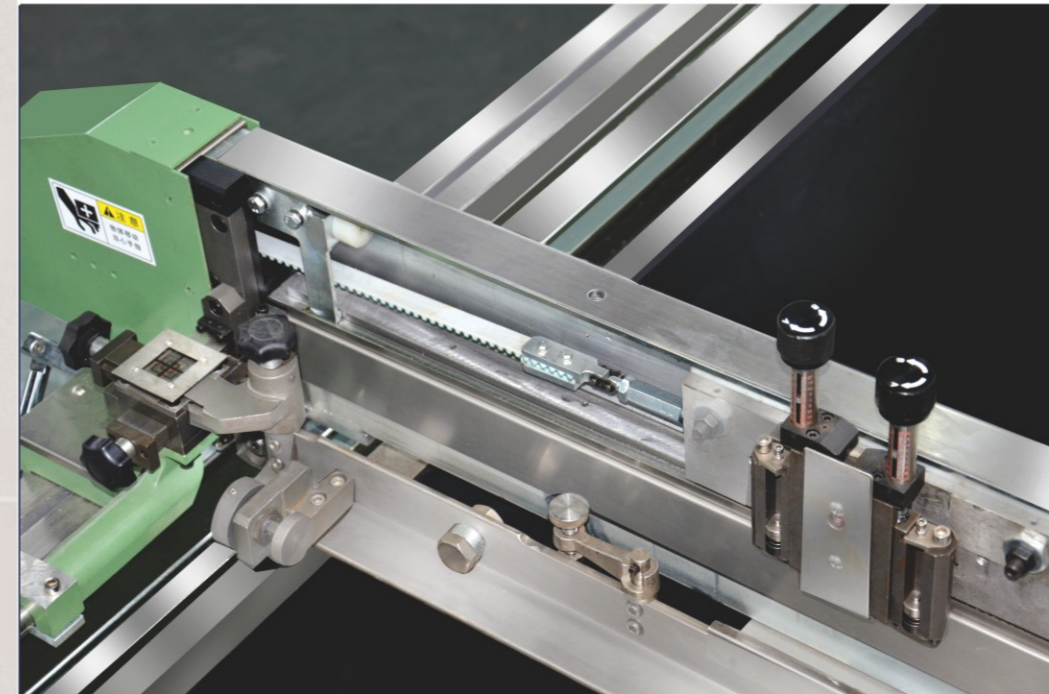

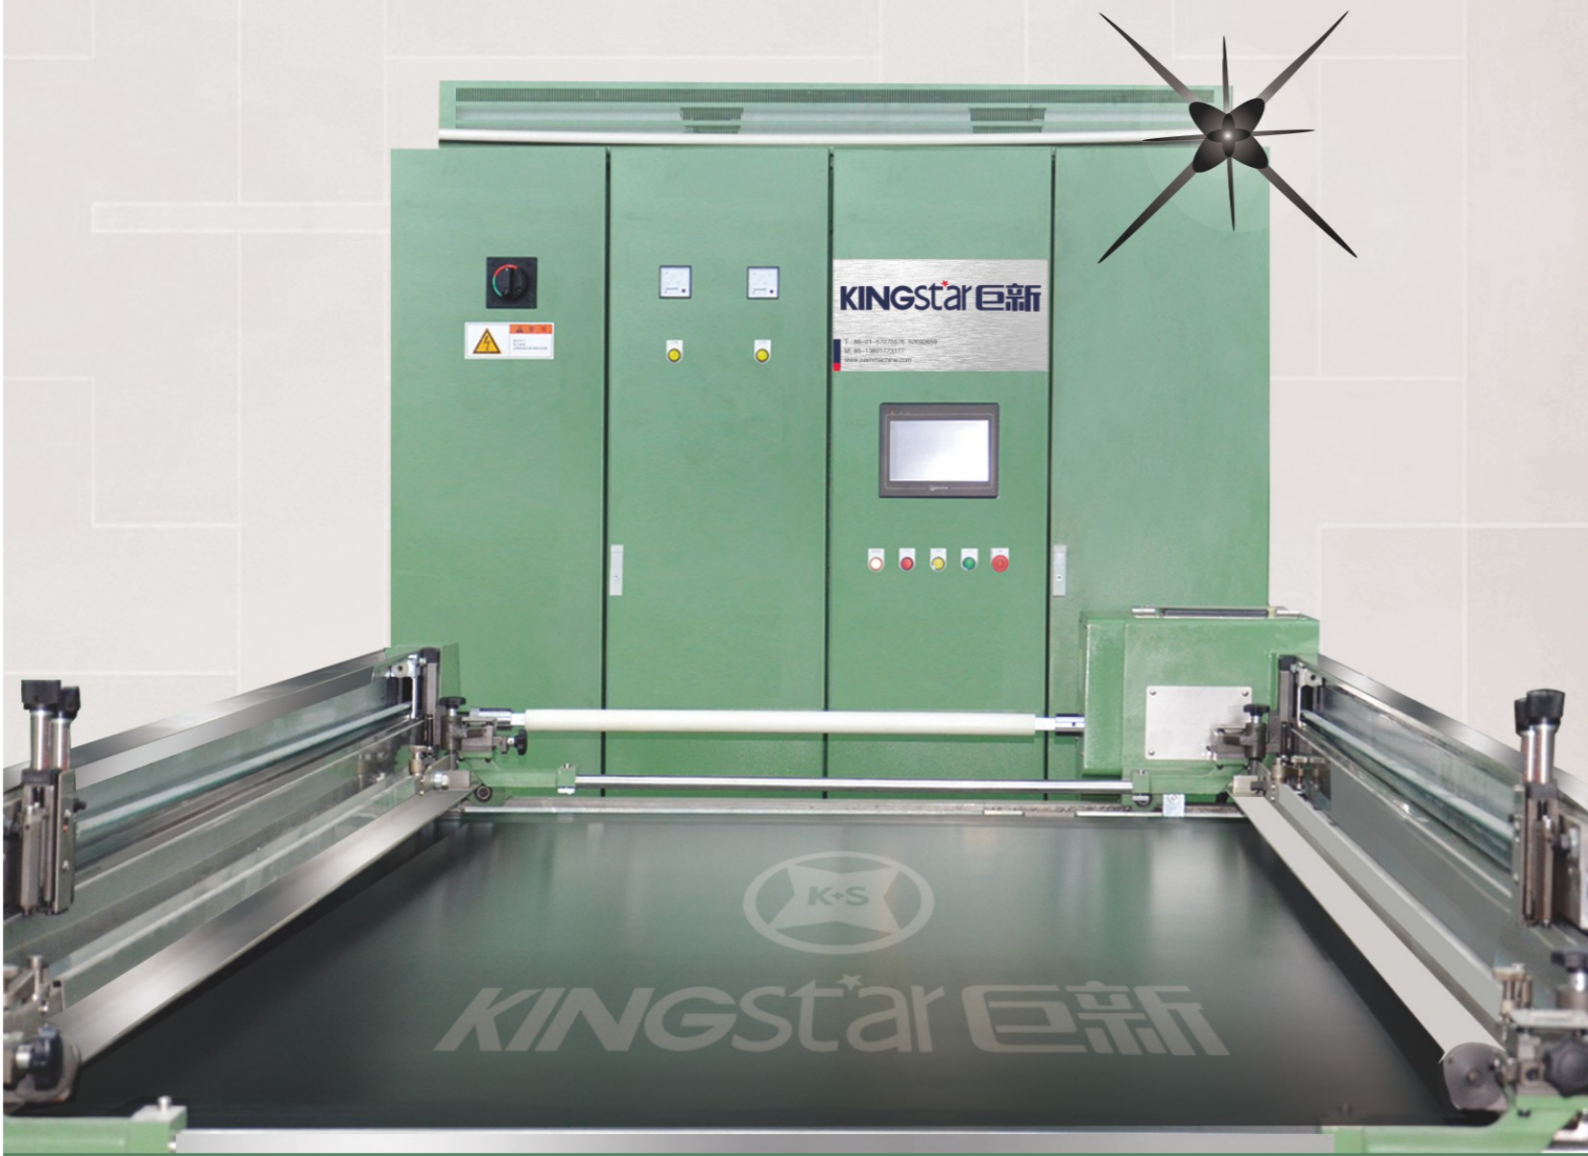

电器控制全部采用国际一流品牌，性能稳定可靠，确保电器故障趋近于零。
Electric control all use the international first-class brand, stable and reliable, to ensure the electrical fault close to zero.

KS-9000 Scraper

Flat Screen Printing

Machine

印花导带水洗机构采用气缸推升及机械结合结构，配备三辊毛刷与两把刮刀及轧水辊配合，可实现对印花导带的全面清洁不带水。

Printing belt washing mechanism uses cylinder rise and mechanical structure, equipped with three roller brush and two scraper and squeezing roller, which can realize comprehensive clean without water for printing belt.

Flat Screen Printing Machine

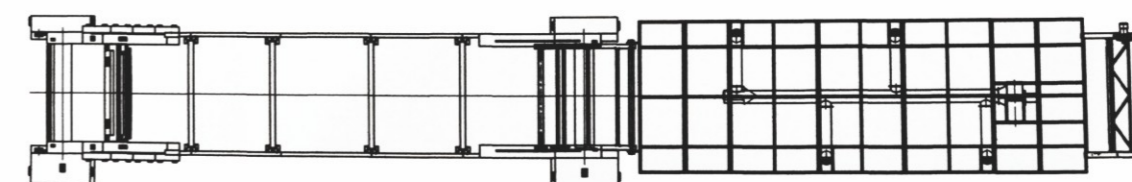

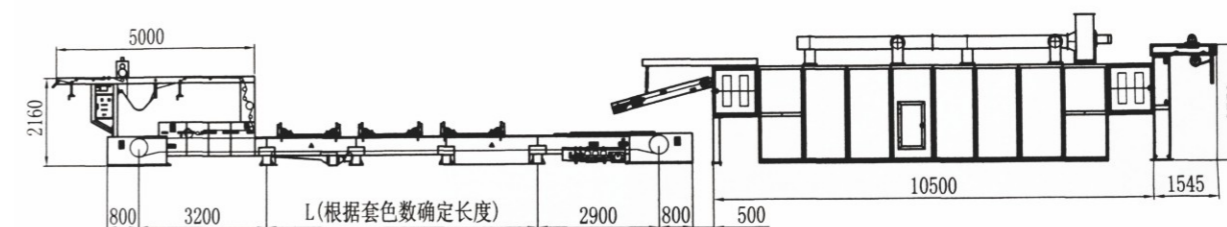

印花后烘干机采用三层网带独立传动输送机构，可实现无张力烘干，烘箱送风方式可提供轴流风机两侧送风及离心风机前后端送风两种方式。

After printing the dryer uses three layer belt independent drive transmission mechanism, realizing drying without tension, baking oven can provide air supply in two ways, axial fans on both sides and centrifugal fans at front and back end.

印花自动打版机，可实现打版与批量生产密切对接，可大幅度提高生产效率，确保花样与批量生产一致无差异。
Printing automatic making machine, which can realize closely butt with batch production, can greatly improve the production efficiency, ensure the pattern and batch production is consistent without difference.

用途 Application	适用于天然纤维、化学纤维及其混纺的机织物及针织物 Application in natural fiber, chemical fiber and other blended woven and knitting fabric.
有效印花幅宽 Printing width	1850mm/2000mm/2200mm/2600mm/2800mm/3000mm
印制套色数 Printing color	8套色/10套色/12套色/14套色/16套色 8C/10C/12C/14C/16C
印制花回 Printing repeat	600mm ~ 2500mm
设计车速 Machine speed	8 ~ 30M/min
对花精度 Register precision	±0.2mm
对花调节范围 Register adjustment range	纵向：±20mm；横向：±20mm Vertical: ±20mm, Horizontal: ±20mm
烘干方式 Drying mode	四风口三层穿布热风烘干 4 air mouths, 3-layer fabric passing, heat drying
烘干热源 Drying source	热油/蒸汽 Steam/thermal
车别 Machine type	左手车或右手车 Left/right hand
压缩空气 Compressed air	0.4 ~ 0.8Mpa
供水 Water supply	水压不低于0.3Mpa Water pressure is not less than 0.3Mpa
机器结构 Machine structure	本机由进布、印花、烘干、落布四个单元组成 It consists off-entry, printing unit, drying and fabric-exit

斜台式圆网印花机

印花台板倾斜一定角度，便于操作,便于检查印花质量。倾斜状态可方便地进行机台上直接洗网, 机台网，色料管，磁棒等同时自动清洗，节水省时。

INCLINED ROTARY SCREEN PRINTING MACHINE

The printing table is inclined at a certain angle, which is easy to operate and check the printing quality. It is convenient to wash the screen directly on the machine in inclined state. Automatic cleaning of machine screen, color tube and magnetic rod at the same time , water saving and time saving.

KSR-9800圆网印花机

ROTARY SCREEN PRINTING MACHINE

圆网印花机

ROTARY SCREEN PRINTING MACHINE

生产效率高

HIGH PRODUCTION EFFICIENCY

操作简便

CONVENIENT OPERATION

劳动强度小

LOW LABOR INTENSITY

产量高

HIGH PRODUCTION

能印制精细花纹

ABLE TO PRINT FINE PATTERNS

倾斜式的设计充分考虑了印花导带运行的安定性，保证导带不跑偏，导带在设定好的轨道上运行。

The inclined design fully considers the stability of the printing guide belt , ensure that the guide belt does not deviate , guide belt runs on the set track .

印花单元采用永久磁铁，不消耗电力，避免了因电压变动而引起的磁力波动，保证印花质量。

Permanent magnet for printing unit , no power consumption , the magnetic fluctuation caused by voltage variation is avoided , guarantee printing quality .

磁棒位于导带的上方，磁台位于导带的下方，磁台对着磁棒。它能保证圆网印花机上胶的均匀性，同时降低人工劳动强度，提高工作效率。

循环流动式供给色浆，可自动回收浆料，节省色料。

The magnetic rod is above the belt , the magnetic stage is under the belt , the magnetic stage is facing the rod, It can ensure the uniformity of glue on the rotary screen printing machine , at the same time, reduce the labor intensity , improve work efficiency.

Circulating and flowing color paste supply can automatic recovery of surplus, saving color paste.

各印花单元及导带均采用伺服马达驱动，自动对花，印花速度快，印花精度高。

换色时不用拆卸、色管、磁棒、圆网、有效地保护了网筒的使用寿命。

Each printing unit and belt are driven by servo motor , automatic registration, high printing speed and precision. When changing colors, it is not necessary to remove the color tube and magnetic rod , effectively protect the service life of the roller.

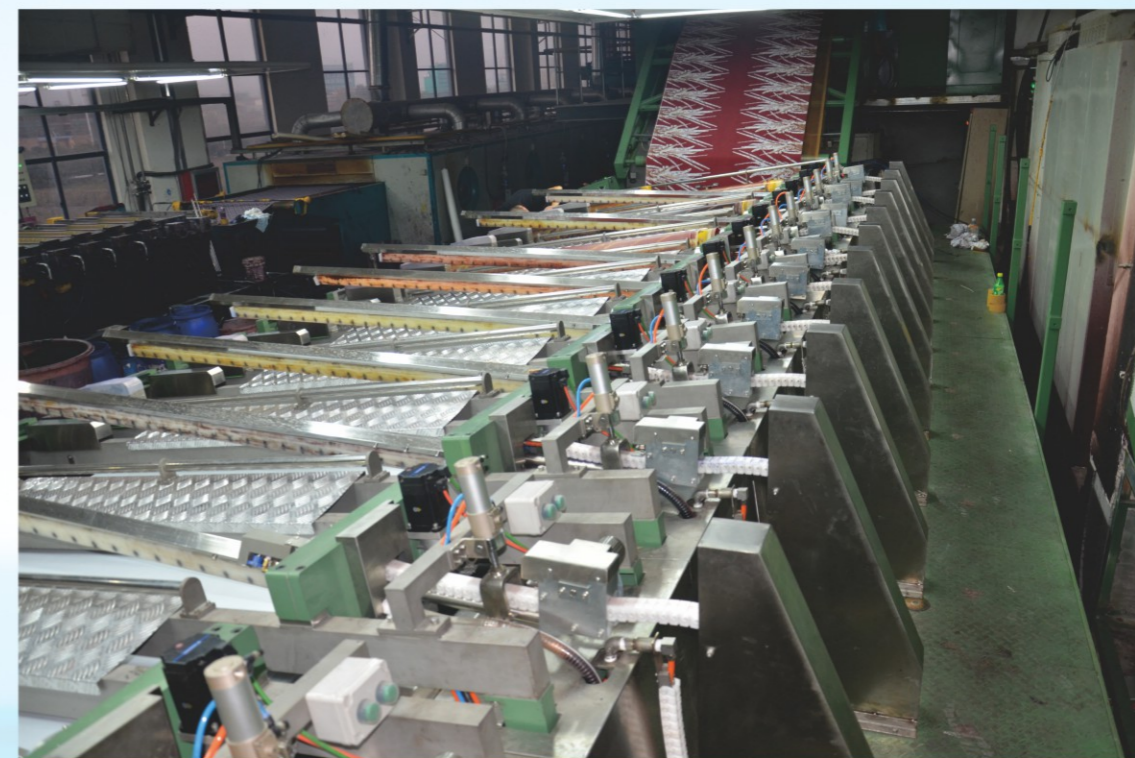

进布装置

适用于针织布，梭织布，无纺布等。进布平整，均匀。可以料车叠布进料，也可以布卷装进料。配备了张力调节装置，进布辊，自动对中纠偏辊，扩幅调节的分丝辊。

CLOTH FEEDING DEVICE

Suitable for knitted, woven, non-woven, etc . Feed cloth evenly . The fabric can be folded in or rolled in . Equipped with tension adjustment device , feed roller, automatic deviation rectifying roller and expanding adjusting splitting roller .

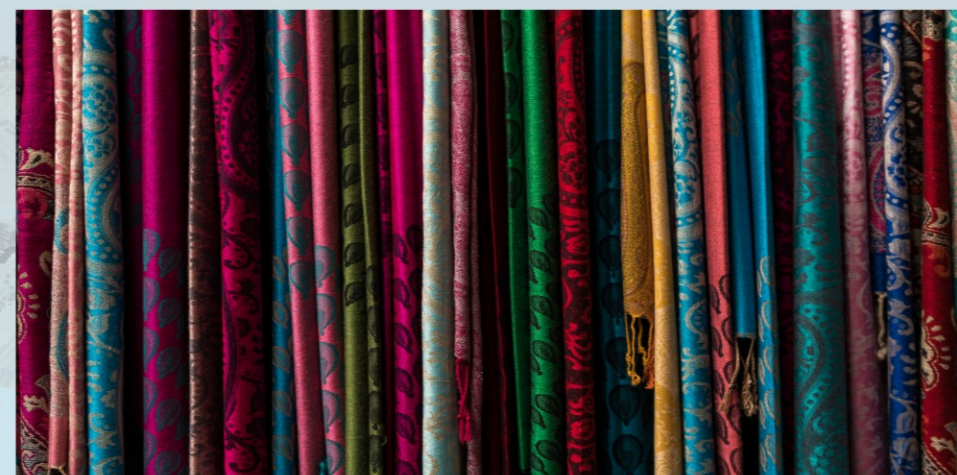

导带清洗装置

导带清洗由两部分组成，先进行予洗，把色料以外的杂物清除，然后利用三个毛刷加双胶刀及磁棒净水，彻底清除导带上的色料，残余水清洗干净。

BELT CLEANING DEVICE

Belt cleaning consists of two parts , pre wash first , remove the sundries beyond the pigment , then use the brush, rubber knife and magnetic rod to clean the water, thoroughly remove the pigment.

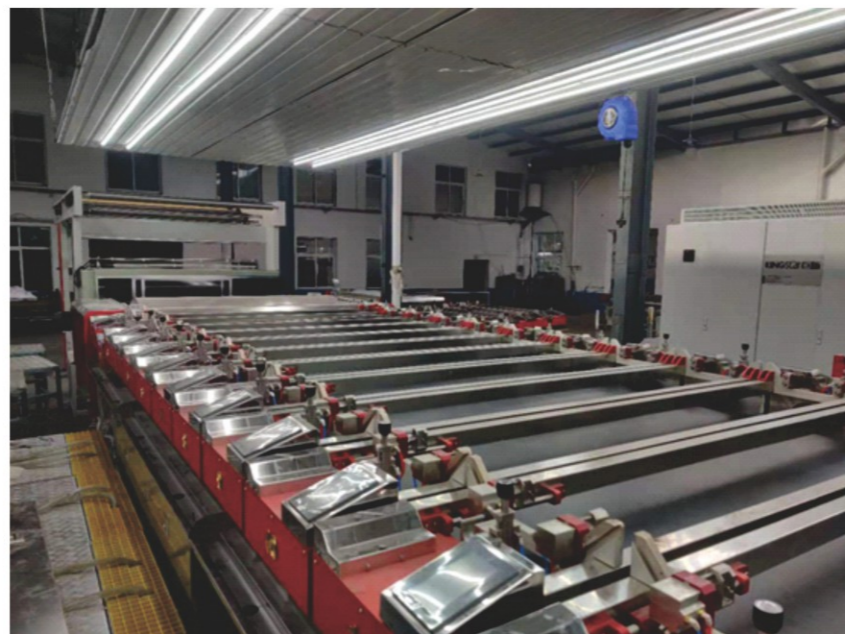

开放式圆网印花机

Open rotary screen printing machine

速度快、印制色彩浓艳、品种适应性广。

High speed, print bright colors, wide variety of adaptability.

开放式网头座，在每一个花位的两侧装有控制面板，在机器两侧都可以进行三个方向的对花操作。挡浆板可有效防止浆料污染导带和磁台等部位，可选用永磁或电磁磁台。每个花位的圆网由伺服电机驱动，从而确保圆网精确对花。

The open mesh head seat is equipped with a control panel on both sides of each flower position, which can be operated in three directions on both sides of the machine. The retaining board can effectively prevent the slurry pollution of the guide belt and magnetic platform and other parts, can choose permanent magnet or electromagnetic magnetic platform. The circular mesh of each flower position is driven by a servo motor to ensure accurate alignment of the circular mesh.

导带水洗包括一个喷管和一把毛刷组成的预洗，两个主动毛刷辊和一个清水喷管由两把刮刀组成。

The guide wash consists of a pre-wash composed of a nozzle and a brush, two active brush rollers and a clean water nozzle consisting of two scrapers.
